

System, Method and Apparatus for International Financial Transactions

Abstract of the Invention

An apparatus, system and method for providing real-time foreign exchange information, cross-border payments, and other financial information and services to clients over the World Wide Web. Real-time foreign exchange rate quotes are provided that may be relied on in timing international transactions to a benefit of a consumer. Single or multiple transactions are automatically converted from a consumer's native currency to any of a plurality of foreign currencies and vice versa, thereby simplifying and facilitating these international transactions.
